Residential Rate Plans

[Home](#) > [Your Home](#) > [Rates](#)

Residential Rate Plans

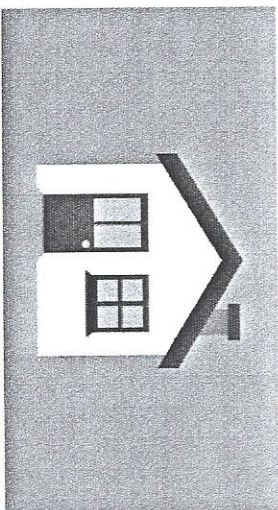

Your home, the size of your family, your schedule, and your lifestyle all play a part in determining your electricity needs. Our plans are designed so you can find the right fit to your household's lifestyle. To see which plan you are currently on, please log in to [My Account](#) or review your current bill.

Time-Of-Use (TOU) Rate Plans

Our TOU plans feature different rates based on the time of day. Electricity rates are lower on nights and weekends, but go up during peak hours when energy resources are in demand.

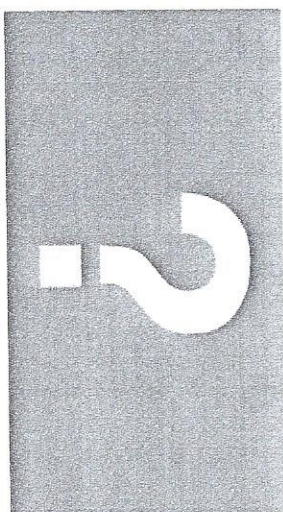

[Learn More](#) >

Tiered Rate Plan

This is a more traditional billing plan. Customers pay a single rate for a "baseline" amount of energy each month. Once that allotment is used, the rate climbs to a more expensive tier. A High Usage Charge may also apply.

[Learn More](#) >

Need Help Choosing?

You can compare your current rate to our other plans to see which works best for you

Conservation Tips

Budget Assistant
Projected Usage By Edison SmartConnect

Budget Assistant is a tool to help you manage your electricity usage and costs.

Edit

Everyday Conservation Tips

- You can stay cooler for less by regularly replacing your air conditioner's filters.
- Switch to CFLs. They use 75% less electricity, and last about 10 times longer than typical incandescent bulbs.

► More Tips

Summer Advantage Incentive

The Summer Advantage Incentive program may benefit households that use little electricity between 2 p.m. and 6 p.m. during the summer.

► Learn More

Summer Discount Plan

You're rewarded with a credit of up to \$180 annually on your bill during summer months for allowing us to temporarily shut off your central A/C compressor for a limited number of hours throughout the year. Enrolling means you agree to allow us access to your property to install a remotely controlled device on or near your A/C unit. You can choose from a variety of options based on your desired levels of savings, comfort, and convenience.

► Learn More

Energy Advisor: 5 Minutes to Energy Savings

Looking to take advantage of the easiest ways to save money on your electricity bill? Our Home Energy Advisor offers information on your home energy usage, ways to conserve and more.

Unfortunately at this time our tool is unavailable for Net Energy Metering customers.

► Learn More

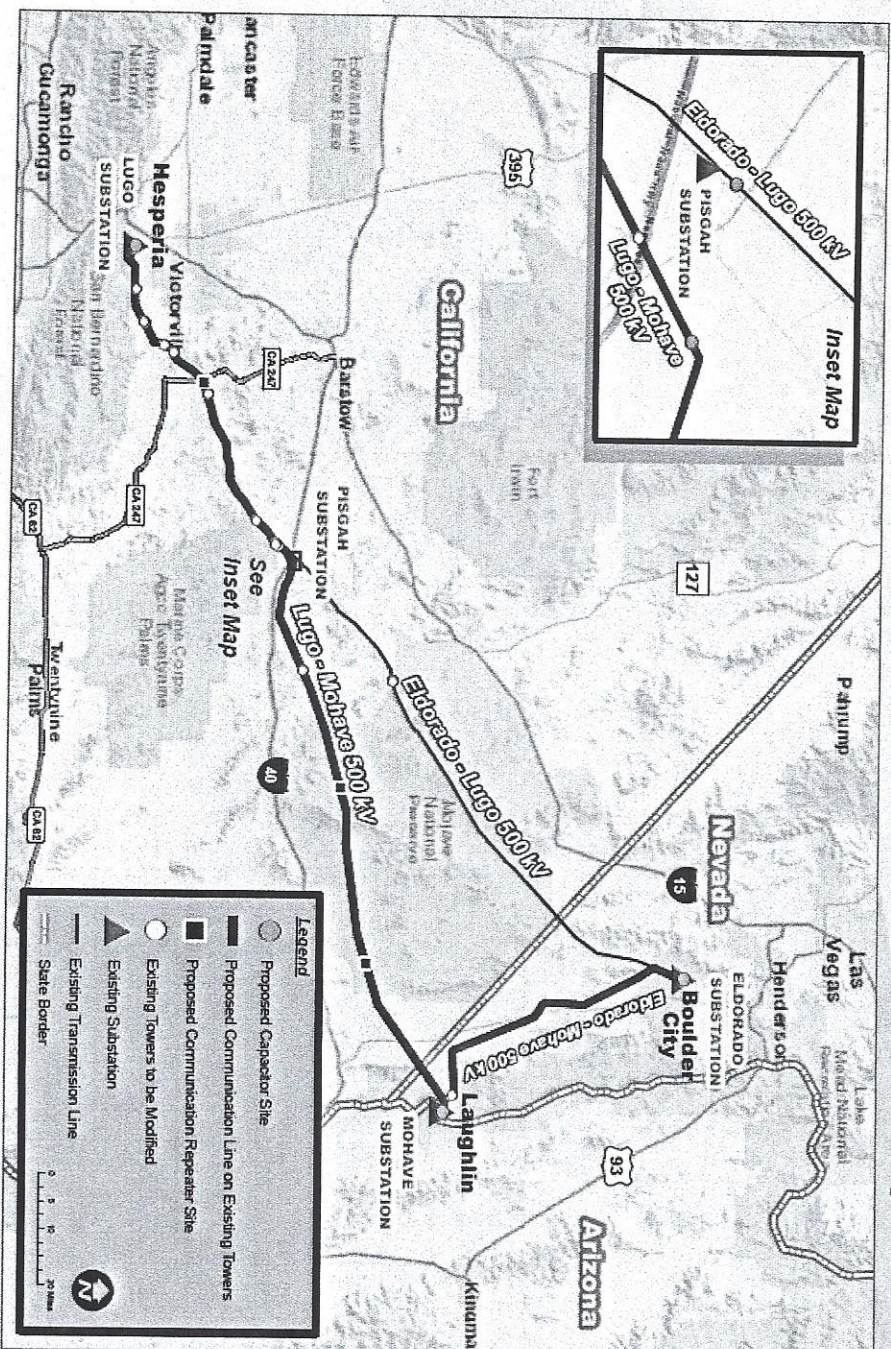

This website provides the most recent data available as of 08-19-18 and is subject to update at any time. Projected next bill estimates are based on your average daily usage and do not include credits or other applicable charges, and will differ from your actual bill.

Eldorado-Lugo-Mohave Upgrade

Eldorado-Lugo-Mohave Upgrade Project Overview Map

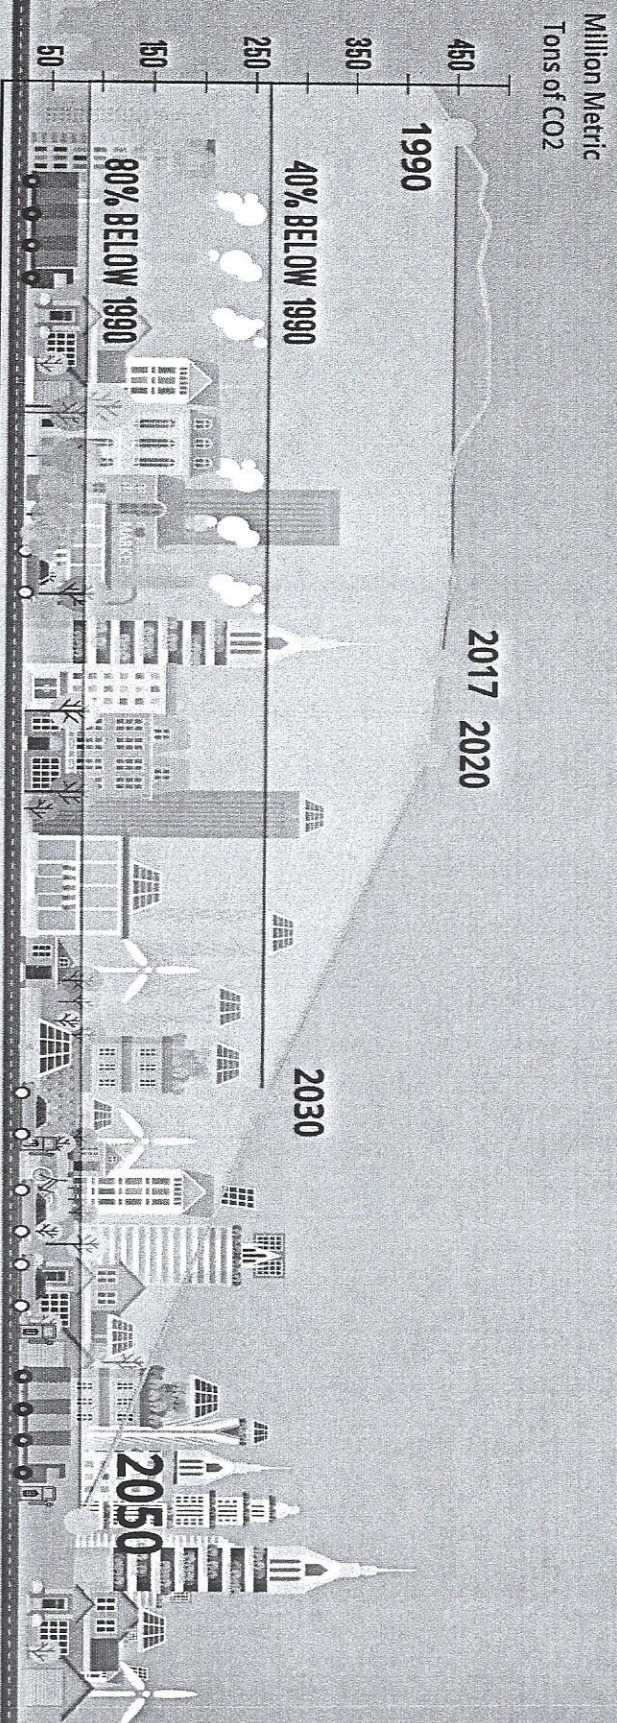

Capacitor Bank – Increase power flow

A capacitor bank (middle of photo) helps electricity to pass efficiently across long distances.

Goals to improve

- California set a goal to **reduce emissions 40% below 1990 levels by 2030**, and **80% by 2050**.

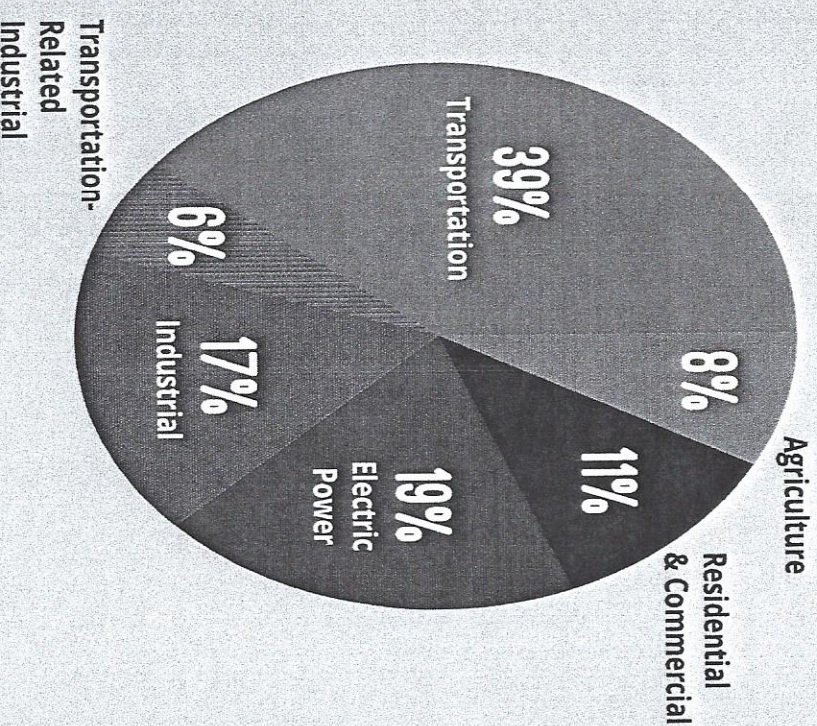

If we want to get to **zero emissions**, eventually we have to **replace** many of the things we rely on today that require combustion.

Emissions contributors

- The **largest contributor is transportation**, followed by the electric sector.

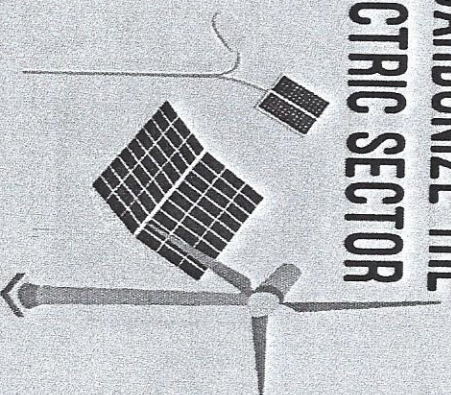

Industrial, and commercial and residential sectors trail not too far behind.

- The most **practical and economical** way to create real change is for sectors to **work together** to find an affordable alternative to fossil fuels

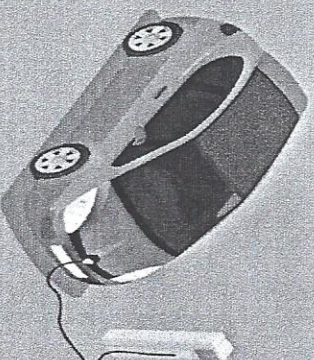

SCE's integrated solution

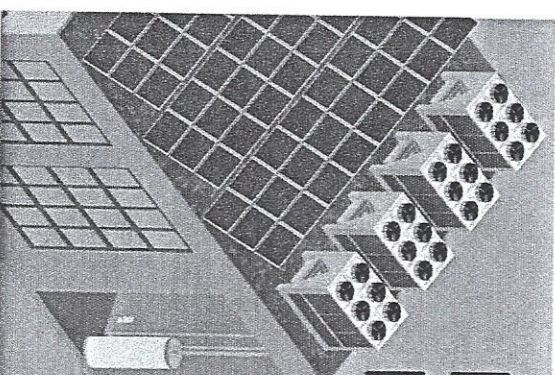

**DECARBONIZE THE
ELECTRIC SECTOR**

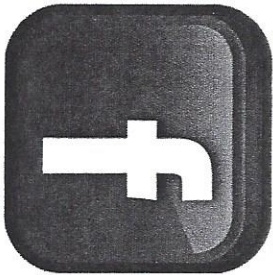

**ELECTRIFY THE
TRANSPORTATION
SECTOR**

**ELECTRIFY
BUILDINGS**

**Clean the power grid. And
electrify.**
