

Allocation of Property Taxes that Funds Special Districts –

4J

We have been pursuing information on how to increase the NCSD's funding. So far we have contacted the offices of Supervisor Rowe, San Bernardino County Tax Assessor, and San Bernardino County Controller.

Supervisor Rowe sent me to Tax Collector and the Tax Collector sent me to Supervisor Rowe. Then the Controller's office returned my call. They actually knew what I was asking for.

There is a 1% General Tax Levy that is divided between County Government, School Districts, and Special Districts.

Brandon from the Controller's office told me the following:

Newberry CSD receives .011318% of the 1% General Tax Levy. However, on the "Where Do My Tax Dollars Go" report found on the Tax Assessor's website, it shows Newberry CSD receiving .1208% from commercial parcels. I haven't checked every commercial parcel.

The other information I asked for was how do we increase our %? I was told the only way was through increase in property values or annexing additional area which would be a negotiation so it may be different yet.

FYI -- Daggett receives .2501% and Yermo receives .1193% from the parcels I checked.
